i. TSS reached out to ~15 other community colleges about their classroom AV setup to create a classroom standard.

ii. Due to budgetary constraints, classroom AV standards will no longer include HyFlex stock but will instead allow for HyFlex components to be added as the president's leadership team identifies classrooms/classes that require them.

iii. Results of pilot classroom

    1. Pros: interactive display allows instructors/presenters to make notes on PowerPoints and other documents; images can be cast from instructors'/presenters' mobile device to display; participants agreed interactive displays being the standard would be an improvement.

    2. Cons: ADA compliance requires the bottom of the display cannot be higher than 36" but this causes students in the
